

## ABSTRACTS FROM UFO-NYT 1984, NO. 6

The following abstracts of original Danish articles in UFO-NYT are provided to our foreign readers in accordance with the aim of the International Committee for UFO Research (ICUR).

### Kim Møller Hansen: GSW Stops Working, p. 9-10.

For some time there have been rumours that Ground Saucer Watch (GSW) would discontinue analysing UFO photos. In personal correspondence with Kim Møller Hansen this is now confirmed. William Spaulding of GSW gives two main reasons for this step: (1) It is too expensive and (2) the present results show that photos can not be used as evidence for ETI visitors. GSW will continue its other activities though.

A final report will appear from GSW at the end of 1984.

It is true that there has been some criticism towards the work of GSW - also from SUFOI - but nevertheless SUFOI will miss this opportunity to have photos analysed. SUFOI are now intensifying the attempts to establish some way of digitizing and analysing photos in Denmark by means of computers.

### Kim Møller Hansen: Danish Photo, Nocturnal Light over Christianshavn, p. 11.

On three occasions Brian Johansen observed a nocturnal light from Copenhagen: 28th of December 1981, 5th or 6th of January 1982, and 22nd of January 1982, each evening around 22.00. On the 22nd of January, Brian Johansen took a photo, which appeared in the Danish Newspaper "Politiken" on February the 16th.

There seem to be no doubt that the photo shows the red star Betelgeuze and that the motion of the phenomenon on the picture is due to motion of the camera.

### Per Andersen: Fools ?, p. 12-13.

For some time ret. major H.C. Petersen (Danish Get Acquainted Programme, IGAP) in co-operation with VonKevichzky (ICUFON) have been sending lots of UFO material to Danish and other Nordic statesmen. The first mentioned strongly believe in Adamski, flying saucers, ETI etc. and want the statesmen to look into their "evidence" for ETI visitors.

Their "proofs" consist mainly of misinterpreted and distorted quotations from high level people (Schweitzer etc.), contactees (Adamski, Monguzzi, etc.) and Carter's sighting of a "UFO" (= Venus).

SUFOI does not dissociate from IGAP believing in flying saucers nor making themselves a fool. But SUFOI regrets that each time IGAP forwards this kind of material to the statesmen it will take another 5 years before they will co-operate with seriously working ufologists.

### Kim Møller Hansen: UFO Classic - Mount Clements, Michigan, 1967, p. 14-16.

Two brothers, Dan and Grant Jaroslaw, in 1967 claimed to have photographed a UFO (Daylight Disc) and their mother gave the story to the press. An

officer from Selfridge Air Force Base stated that it was the best he had ever seen. Hynek at the time: "I can not quite say whether the pictures are authentic or not. But at the present time I can not regard it as a hoax". Blue Book concluded: "Insufficient data".

In 1976 Hynek received a letter from the two now grown-ups. They admitted that the photos were fakes and regretted that it had all gone out of their control.

And indeed it has! In a book from 1976 Brad Steiger publishes the pictures as evidence for UFOs. And in a memorandum from ICUFON (1978) to UN the pictures appears again. And so on, and so forth ... !!

Kim Møller Hansen: Anti-gravitation and The Cosmic Conspiracy, p. 33.

In UFO-NYT 1984, No. 3, SUFOI published an article from John Schuessler about the "seriously" working Stan Deyo (new energies). New information has now been received from the Australian magazine "The Skeptic". It seems that Stan Deyo certainly is not as serious as Schuessler wants him to be. Deyo's book, The Cosmic Conspiracy, has been sold in 100.000 copies and that is equally incomprehensible as its content!

Reviews, p. 46-47 (by guess who!)

Lena Stiessel: Min første bog om verdensrummet. (My first book about the Universe).  
Gyldendal, Copenhagen, 1984.

Jan S. Krogh: Hessdalsrapporten. (The Report on Hessdalen).  
NIVFO, Box 2119, N-7001 Trondheim, Norway. 1984, 120 pp.
